

YP - Day 1 - 01/10/2021

Tuesday, April 21, 2020 2:47 PM

Have you guys ever been exposed to programming before?

Have you guys touched HTML and CSS before?

IDE: Integrated development environment

I will complete 6 projects with you, but before that, let's learn some basic knowledge and do some preparation for the projects.

1. How to use the Trinket.

- New Trinket - select the HTML
- Reset the Trinket
- Rename the Trinket
- Save the Trinket - Keep a good habit of saving code, which is very important for programmers

Question to Student: Are you familiar with the operation of Trinket?

2. What's the HTML.

- Two important concept: Tags and Items.
- `<head>` and `<body>`
- `<p>` tag introduction
- Add another paragraph
 - What's your name
 - What is your hobby

Question to Student: Write the sentences did you write?

- Add the `` tag
- Add the `<u>` tag

Question to Student: Do you have any question here?

3. What's the CSS

- CSS stands for Cascading Style Sheets, and it is a language used to style webpages and make them look nice.
- Add the CCS file
- Add the background of the body
- Add the color for the `<p>` tag

Question to Student:

- Can you make the paragraphs of text orange?
- Can you make the background grey by changing the body property?
