YP - Day 6 - 02/13/2021

Let's make the third card as the first project.

In this project, you'll learn how to make your own poster. Give a sample here;

Ask students choose one way to continue the project

Online
1. Create the Project online
- HTML
- HEAD
- BODY
- CSS File
- Link CSS File

I will give you guys some challenges:
- "Improving your poster" - adding new CSS properties to the div selector;
- div
  - H1
  - H3
  - IMG
  - P
  - P
- "Improving your image" - adding new CSS properties to the img selector;
- "Make your poster awesome" - adding new CSS properties and new h3 and p selectors;
- "Advertise an event" - Writing and editing HTML and CSS code.

border-radius
 For one comer or for four corner, left top, right top, right bottom, left bottom
 Clockwise order(顺时针)

Style Image
- Add border
- Change the padding
- Can you give your image a background colour? Or a rounded border?

H1
- Have you noticed that there's a big space between the <h1> heading and the stuff around it?
  - This is because there's a margin around the heading. A margin is the space between the element (in this case a heading) and the other stuff around it.

H3
- color: black;
- background: lightblue;
- font-family: Arial;
- font-size: 12pt;
- font-weight: bold;
- text-decoration: underline overline line-through;
- text-align: center;
- border: 1px solid black;
- margin-left: 50px;
- margin-right: 50px;
-

After the class, firstly, I will introduce you guys two different ways to develop the HTML&CSS
- Online
  - https://trinket.io/
- Offline
  - https://rpf.io/p/en/wanted-go, you will download a zip file into your computer.
  - Unzip the file
    - Right click the mouse, choose the "Extract All"
  - Introduce each file
    - HTML file
    - Css file
    - Picture file
