# YP - Day 3 - 01/24/2021

Saturday, January 9, 2021      10:07 PM

1. Last lesson review
- Open the previous project
  - Login Trinket.io ->  Select "My Trinkets" ->  Choose the project
- We have made two parts:
  - Outside card
    - Add the <title>, <img>, <button>
    - How to add img
  - Inside card
    - Add the <title>, <img>, <button>
    - How to add img

2. This lesson
- Add the properties for each item
  - #outside
    - position: absolute;
    - width: 100%;
    - height: 100%;
  - Same as #inside
    - position: absolute;
    - width: 100%;
    - height: 100%;
  - How to control the page display order?
    - #outside ---------> z-index: 1;
    - #inside    ---------> z-index: 0;
    - The largest number will be displayed at the top
  - Adjust the outside card display
    - #outside-title  ---------> front-size: 20px
    - #outside    -------------> text-align: center
    - Add button -------------> background: sliver;   border-radius: 12px;   border: 5px solid blue;
  - How to switch to next div?
    - Add script.js file -------> copy to the students
    - Add js file to html  ----> guide the students
    - Add the css file ---------> #outside : transform-origin: 0;   .open-card {transform: rotateY(90deg);}
  - Decorate the inside card
    - Adjust the title
    - Adjust the picture
    - Adjust the button
  - Increase delay effect
    - #outside -------> transition: 1s;
